DETAILED ACTION

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Oman et al. (4,075,500). Oman et al. disclose a wind power generation device comprising: a substantially cylindrical duct 50; an impeller 12 having a plurality of blades protruding outward; a pencil bodied nacelle 14 housing a generator 46; characterized in that the duct wall has a sidewall with a wing section (Figure 4) inclined at a predetermined angle to the duct axis so as to be able to produce a reduced pressure area at the rear of the duct, the tip of the nacelle being with the duct and the rear end protruding from the rear of the duct, and the tips of the blades being provided in a maximum wind speed area in the duct.

CONCLUSION

Allowable Subject Matter

Claims 3-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
